

## THE ROYAL SOCIETY OF NEW SOUTH WALES BOOK CATALOGUE INFORMATION FORM

The Royal Society of NSW has arranged for Halstead Press to create a catalogue of members' books and other books of interest to members, for sale to members at reduced prices. The aim is to create greater collegiality by making members aware of what other members have published in book form, and to encourage cross-member communication. It will also demonstrate the wide range of interests and disciplines inherent in the Society.

The Society also intends to develop a descriptive bibliography of books members have written, edited or contributed to, as a persistent record of member activity.

In order to establish the catalogue, we invite you to list any books you have written or edited on this form, and return the completed form to Halstead Press at the address on the form, either email or hard copy. Please use the 2nd page of this form to supply details of each book, one page per book. Please use as many duplicates of the 2nd page as your list of works requires. Information you can't supply may be omitted. Even books which are highly specialised, or for other reasons unlikely to suit the catalogue, should be included. This information will allow Halstead Press to source books and determine those most suitable for the catalogue. All book information supplied will be used to create the bibliography.

The Society hopes this initiative will stimulate the reading and citation of your books and alert members to titles of interest they may not be aware of.
